

ADJUSTABLE HEIGHT WORK PLATFORMS

**BULLETIN
NO. 106H
Page 1 of 2**

With Ergostand Adjustable Height Work Platforms, operators can now adjust their working height for maximum efficiency. Other benefits provided by Ergostand platforms include:

- Improved work station ergonomics by allowing operators to work at their most comfortable height
- Reduce fatigue and increase productivity
- Lower-cost solution compared to cost of changing line height or height of machine or process
- Ergostand Adjustable Height Platforms are available in both standard and custom sizes
 - Heavy steel construction for a firm, steady support deck
 - Fully adjustable throughout lift range
 - Easy height adjustment with foot valve up/down control
 - Easy installation. Simply connect to plant air supply line

STANDARD OFFERING

All of the following units have 400 pound capacity, 4½" lowered height, and 10"

MODEL NO. *	TOP SIZE (in.)
ES-3648	36 x 48
ES-3660	36 x 60
ES-3672	36 x 72
ES-4848	48 x 48
ES-4860	48 x 60
ES-4872	48 x 72

* OTHER SIZES AVAILABLE. CONSULT FACTORY.

Lowered height of only 4½"

Fully adjustable from 4½" to 14½" high

The need for adjustable height work platforms can occur wherever operator working height changes due to changes in machine or tooling height. Model or product changes can result in changes in working height. The need can also occur where the working height is fixed, but the physical height of the operators varies.

OPTIONAL EQUIPMENT

Accordion Safety Skirt:

Encloses the four sides of platform to minimize pinch points. To order add "S" to model number (i.e. ES-3648S)

Anti-Fatigue Mat:

The platform top deck can be covered with an ergonomic, anti-fatigue mat. Request pricing for this option.

ADJUSTABLE HEIGHT WORK PLATFORMS
